SUMMARY

Detail-oriented Frontend Developer in the Oklahoma City Metro. 5+ years of professional experience in developing enterprise-level software, enhancing user experience, and collaborating with cross-functional teams. Proven experience in creating responsive web applications with an eye for accessibility. Proficient in React, TypeScript, HTML 5 and CSS 3.

PROFESSIONAL EXPERIENCE

Frontend Developer

Sparq, January 2023 – October 2024

- Added comprehensive accessibility to a financial-sector client's web applications
- Gave a short tutorial in using the NVDA screen reader to frontend team colleagues
- Assisted a multinational client in developing an SMS-based rental application, enabling all post-booking communication through phone texts – used at thousands of rental locations
- Used the client's API together with the Twilio API to implement SMS-based functionality
- Volunteered to pair-code with backend team colleagues to help move timeline-driven work to production

Associate Frontend Developer

Sparq, January 2019 – December 2022

- Collaborated with multiple Sparq colleagues across four Sparq teams to implement features, add enhancements and fix bugs in a large automotive client's online marketplace
- Rebuilt another client's spend-management application from the ground up using React, TypeScript and Styled Components; collaborated with the client's IT team in Belfast, Ireland
- Reduced load times in the spend management application by as much as 50% by re-sizing large-file assets, and removing unused ones
- Quickly picked up amCharts 4 and AG Grid to create data-rich, informative charting and tabular components
- Quickly picked up Storybook to create new components and test them in isolation
- Wrote end-to-end tests in Cypress, and unit tests with Jest, Enzyme and React Testing Library

TECHNICAL SKILLS
